Why Care about HTS and PGAs - *Together*?

Harmonized Tariff System (HTS) and Partner Government Agencies (PGAs) guide brokers and importers through entry requirements specific to the products

- Marking and labeling
- Testing
- Safety standards

©2024 by Schulz Trade Law PLLC

How Do the HTS and PGAs Overlap?

- Create a common language for customs officials and PGAs to communicate about specific nature and classification
- Flag which shipments to inspect or regulate based on their specific requirements.
- Enable communication and coordination between customs authorities and PGAs

Hypothetical (cont.)

- The HTS code triggered a flag in the automated Broker Interface (ABI).
- The broker overrode the flag and move forward with the import process.

©2024 by Schulz Trade Law PLLC

Hypothetical (cont.)

- Purchase Orders are rolling in for the amazing Super-Kolinsky paintbrushes, and Ross Bob is excited. He expects to hit his sales goal for this year.
- But ... Ross receives an email from ASI's customer broker.
- A Customs officer has seized the goods at the Port.
- What might be going on?

©2024 by Schulz Trade Law PLLC

Hypothetical (cont.)

- The broker reaches out to the customs officer, who tells him the problem is with the U.S. Fish and Wildlife Service.
- Convention on International Trade in Endangered Species (CITES) requires Customs to hold this shipment for inspection.

©2024 by Schulz Trade Law PLLC

Hypothetical

- Customs explains that F&W suspects this is a shipment of special paint brushes containing the hair of the endangered Siberian weasel.

©2024 by Schulz Trade Law PLLC

Hypothetical

- To resolve the flag, Ross Bob begins to coordinate with the broker, trade counsel, and F&W.
- He hires a testing company to test the brush hairs to determine if they are, in fact, weasel hair brushes.
- Fortunately, the test came back showing the hairs were synthetic.

Harmonized Tariff Schedule (HTS)

Customs uses HTS to determine:

- tariff rates,
- quotas,
- restrictions, and other trade-related measures applied to imports and exports.

General Rules of Interpretation (GRIs)

- GRIs provide guidance on how to interpret the HTS and ensure **consistent** classification across different countries and customs authorities.
- Be aware of Explanatory Notes

©2024 by Schulz Trade Law PLLC

General Rules of Interpretation

	Description
GR1	Prescribes how to classify products at the 4-digit Heading level, based on the wording of the headings and relative HS Section and Chapter Notes.
GR2	Prescribes how to classify both incomplete and unassembled goods, mixtures and combinations of goods.
GR3	Prescribes how to classify products that are, <i>prima facie</i> , classifiable under two different HS headings.
GR4	Prescribes how to classify products that cannot be classified according to GRI's 1, 2, and 3.
GR5	Prescribes how to classify packaging.
GR6	Prescribes how to classify products at the 6-digit subheading level, based on the wording of the subheadings and the relative HS Section and Chapter Notes.

Case Study (Cont'd)

H304957

- Application for Further Review (AFR)
- Protest No. 0901-18-100238, dated October 17, 2018,
- Port of Buffalo
- on behalf of Flavour Art North America Inc. (“Protestant”)

Case Study (Cont'd)

- 2018 HTSUS headings under consideration.

3302 Mixtures of odoriferous substances and mixtures (including alcoholic solutions) with a basis of one or more of these substances, of a kind used as raw materials in industry; other preparations based on odoriferous substances, of a kind used for the manufacture of beverages

3824 Prepared binders for foundry molds or cores; chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included

©2024 by Schulz Trade Law PLLC

Case Study (Cont'd)

*Why did it matter
whether the e-cigarette liquids were under
HTS 3302 or 3824?*

©2024 by Schulz Trade Law PLLC

Case Study (Cont'd)

- CBP applied General Rules of Interpretation (GRIs)
- Classification of the subject merchandise in heading 3824 is appropriate when there is no tariff category that covers the merchandise more specifically.
- CBP agreed with protestant: subject merchandise is more specifically covered by heading 3302.

What to Do if HTS Triggers a PGA Flag

1. Review	2. Communicate	3. Coordinate	4. Fulfill	5. Resolve
Review the flag	Broker - communicate with the importer	Coordinate with the relevant PGA	Fulfill PGA requirements Or protest Can show CBP why	Resolve the flag

USDA Case Example

American Meat Institute v. USDA (2014)

- American Meat Institute challenged a new regulation implemented by the U.S. Department of Agriculture (USDA) that required meat and poultry producers to include **additional information on their labels** regarding country of origin.
- The American Meat Institute argued the regulation imposed unnecessary burdens on producers and violated First Amendment rights by compelling them to include certain information on their labels.
- Court ruled that the USDA regulation was a reasonable and lawful measure to protect consumers and promote transparency in the meat and poultry industry.

Hypothetical – PGA Flag for Rollers

- ABC company inc. is an industrial manufacturer that purchased 7 wheels.
- They want to import these wheels for several dollies to use around the warehouse.

©2024 by Schulz Trade Law PLLC

Cont. Hypothetical

- The wheels were classified under 8716.90.5059.
- Since this classification also includes parts of vehicles subject to NHTSA, it triggers a flag when the broker enters the HTS code

©2024 by Schulz Trade Law PLLC

Cont. Hypothetical

- In this case, the vehicle and part are not subject to NHTSA.
- The code to state and clear the flag is **OEI1**.
